# Investment Process

## Step 1 - Idea Generation

- 19 unique multi-factor screening models are used, covering valuation, profitability, momentum and sector specific variables.
- Investment team conducts over 1,000 company meetings each year as part of rigorous bottom-up research process.
- Supported by Quantitative Analysts and Small Cap team.
- Given the narrower focus of the EMU investment universe, the Portfolio Manager also actively searches for new investment ideas outside of the benchmark.

## Step 2 - Build Investment Case

Further distillation of produced companies list:

- Builds investment cases for suitable candidates, supported by a proprietary discounted cash flow model and Enterprise Value/Capital Employed vs. Return on Capital Employed model.
- Stock selection criteria: financial strength, cash generation, competitive position, management, business strategy and growth prospects.
- Stock selection and weight assignment are based on the Portfolio Manager's own research and Analyst recommendations.

## Step 3 - Portfolio Construction

*Core and Opportunistic Holdings:*

- The core element (approx. 75%)
  - Holdings that meet our quality criteria.
  - Holdings expected to capture strong industry trends through their attractive competitive positions.
  - Less sensitive to short-term volatility due to long-term holding periods.
- The opportunistic element (approx. 25%)
  - Objective is to exploit a prevailing market trend, market capitalisation bias or even geographic opportunity.
  - Stocks will meet most of our quality criteria.
- High conviction approach: each position held as an overweight (at least 1% versus benchmark).\*
- Dedicated risk strategies team provides the Portfolio Managers with measures and tools to actively monitor and control risk.
- Sell discipline: target valuation price reached, change of investment case or better investment opportunity arises elsewhere.

\*Note: these are internal guidelines and not prospectus limits and may be subject to change over time.
