

Yearly Portfolio Update

Pioneer Funds – Euro Aggregate Bond *31 December 2009*

Bond

Pioneer Funds – Euro Aggregate Bond (Class A, non-distributing, EUR units) outperformed versus its benchmark, the BarCap Euro Aggregate Index, during 2009 supported by a number of diverse and successful investment strategies. Duration management via the European and US curves was a significant contributor and, within the fixed income core of the portfolio, our asset allocation strategy was key, in particular our decision in March to increase exposure to corporates. The disruption in the markets experienced over the period gave rise to relative value opportunities via swap and spread positions. Elsewhere, inflation trades and FX trades also contributed.

In terms of Portfolio positioning, we have slightly decreased the iTraxx exposure and remain long duration versus our benchmark.

Going into 2010 the outlook is mixed. We believe that eurozone growth will be positive but it remains to be seen when and how the European Central Bank will start reducing liquidity, possibly at the end of the second quarter. When the liquidity is reduced, some volatility among the credit spread may offer a good entry level for increasing our corporate exposure.
